

Recipe for Slime

Ingredients

1 cup hot water

1.5 tsp. Borax (non-toxic/available in the laundry powder section of your supermarket)

2 cups clear glue

2 cups warm water

1 tsp. liquid watercolor

Method

Mix 1 cup hot water and 1.5 tsp. of Borax until dissolved. Set aside. Mix 2 cups of clear glue and 2 cups of warm water together in a plastic bowl. Using a metal spoon, slowly pour Borax mixture into the glue mixture while stirring quickly. Stir until the mixture leaves the side of the bowl. The slime will be sticky. Knead the mixture until it is no longer sticky. The more you work with it the easier it will become!
