

## **Uncooked play dough**

### **Ingredients**

3-4 cups plain or bread flour

1 1/2 cups salt

1 1/2 tablespoons cream of tartar

2 tablespoons of vegetable oil

2 cups hot water

food colouring

### **Method**

Mix together in a bowl three cups of flour, the salt and cream of tartar. Add the oil and water and knead for five to six minutes with an electric mixer or eight to ten minutes by hand. Add more flour until the dough is soft and malleable. Store finished dough in an airtight container to prevent drying out. If it does become too dry, add a drop of water and knead again. If you want multiple colours, divide the dough and knead in the food colouring after the dough is made. If one colour is sufficient, add the food colouring with the water and save the step of kneading in the colouring. To keep the food colouring from staining your hands, you may wish to wear gloves for the kneading.
